

The group «Cocococock» had been created as a workgroup inside the Belgian association F.E.R.N. («Faune, Education, Ressources Naturelles» asbl) and Jean-Claude Ruwet is its founder Chairman. The group Cocococock wishes to intensify the studies on small isolated populations. Its aims are the coordination of all interested will, the collect of information, the incitation to more research effort, the definition of Conservation Policies related to small isolated populations of Black Grouse.

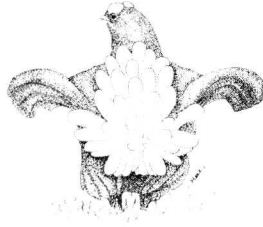

To join it, you have only to declare that you do agree with these founder principles and to ask to be included in our list of participants. If you are into and don't agree, you can ask to be removed from the list. This list will become a list of members (without registration fees) interested in research on Black Grouse. Visit the web-site and send your comments :

<http://www.ulg.ac.be/museezoo/cccc>

There is now a page with links to other websites related with Black Grouse. Perhaps you or your institution is involved in such a web-site : please communicate us the URL address.
